The tourist recreational cluster "Tsar-Grad" is being actively developed in Yoshkar-Ola. The main project objective is creating a unique image of Yoshkar-Ola as a tourist destination, attractive for different tourist categories, establishing conditions for tourism development by means of developing tourist recreational facilities, expanding the range of services, and increasing the level of services rendered to the Russian and foreign tourists.

Tourists grow interested in places and sites located on the banks of the Volga River – an old merchant city with the unique monuments of wooden architecture and the famous Sheremetyevs' Estate in settlement Yurino.

In connection herewith, the cruise and yachting tourism is a prospective recreation type for the Republic of Mari El.

Cruise liners are hosted by a smaller city of Kozmodemyansk– an old merchant city with the unique monuments of wooden architecture. There are over 160 historic and architectural memorials of the regional and local significance, which are of interest for tourists. Kozmodemyansk is annually visited by approximately 100 thousand tourists and excursionists.

Such tourist directions as cultural educational, rural, ecological, ethnographical, educational, athletic tourism, etc., are actively developed.
